

Environmental Policy Menzolit Limited

At Menzolit Limited, on Farrington Road, Burnley, we are committed to the protection of the environment by aiming to prevent negative environmental aspects associated with our design & development, manufacture, testing and supply of thermo-set polyester moulding compounds in both sheet (SMC) and dough form (BMC), including procurement of raw materials and services, storage and external transportation.

We aim to consider these aspects from acquisition of raw materials to end user. We are fully committed to the protection of the environment including the prevention of pollution in all aspects of our operations and implement an environmental management system that ensures a commitment to continual improvement in terms of enhancing environmental performance on an ongoing basis.

We bind ourselves to fulfil our compliance obligations and keep up to date with relevant environmental legislation, ensuring that all requirements are implemented. We also consider the requirements of our various interested parties from customers, employees and anyone who may be effected by or have an interest in our environmental performance.

With the above areas taken into consideration Menzolit environmental management system provides a framework in accordance to ISO 14001. This includes:

- The effective control of our operations regarding environmental aspects such as noise, waste, spillage and housekeeping
- The regular assessment of our environmental performance through impartial Audits and inspections
- The review by our Top level management , where the setting and follow-up of objectives and targets takes place to ensure they are met
- The development and maintenance of adequate competency and training via a proactive attitude to staff training and development, to educate all our employees to behave in an environmentally responsible manner.

This policy is subject to periodic review and is displayed on site in key areas. It is also available to all interested parties.

Joan Montobbio
